architects' nook selected works architectural

Architects' Nook is a multi - disciplinary architecture firm designing almost all typologies of buildings - **residential, commercial, industrial, institutional, healthcare, religious complexes**, etc. It has been our dream to create an image that upholds design integrity and professional rigor, and earn the unquestioned loyalty of our esteemed clients.

We attribute our continued growth and strong design reputation to the expertise, creativity, tenacity and unwavering commitment of our team. Here **architects, designers, engineers** all work in tandem with other specialized teams.

Our practice offers comprehensive **architectural, civil engineering, interior design, project management** and **valuation services**. It assists clients in the cost - effective ecological sustaining solutions.

Personal recommendations form a great part of our heritage and private clients often return when they move homes or when their family grows.

“ We commit to satisfy our valued clients up to the brim of their expectations by continually upgrading our skills with application of new trends with a pragmatic approach. We are characterized by distinct ideas, disparate missions, contrasting convictions and divergent preferences.”

Ar. Kirit Bhatt

Principle Architect, Proprietor

Bachelors of Architecture,

Sir J J school of architecture, Mumbai, 1968.

Started practice in his home town Vapi in 1969.

Chairman of the Indian Institute of Architects, Gujarat chapter; two consecutive terms.

Represented Dadra and Nagarhaveli in the council of architecture, New Delhi.

Executive committee member of the Indian Institute of valuers, South Gujarat branch.

Also achieved various designations in social organizations.

Er. Manish Bhatt

Project Director, Structural Engineer

Pune University, 1992.

Joined the practice in 1994.

In-charge of engineering division, general administration, project management and valuation.

Ar. Kashyap Bhatt

Principle Architect,

Pune University, 1992.

Joined the practice in 2000.

Design lead for planning, architectural detailing, and 3D visualisation

SERVICE PORTFOLIO

Architecture

- Context analysis and site evaluation.
- Concept development and design strategy.
- Preparation of schematic architectural drawings for preliminary discussions.
- Material selection and specification finalisation.
- Preparation of final architectural drawings.
- Preparation of approval drawings.
- Preparation of 3d visualisation of projects (optional).
- Preparation of working drawings for construction.

Engineering

- R.C.C. Design
- R.C.C. Details
- Structural Details

Interior

- Client brief analysis and space planning.
- Concept development and design strategy.
- Preparation of layout plans and furniture planning.
- Material, finish, colour, and lighting selection.
- Detailed interior design drawings and technical documentation.
- Photorealistic 3D visualisations and design presentations (optional).
- Working drawings and execution details for site implementation.

Documentation

- Preparation of estimates.
- Floating tenders.
- Preparation of comparative statements and scrutinizing the tenders received.
- Preparing and executing the agreement of works between the owners and the construction agency/s.
- Preparation of bar-charts for events of works to be executed.
- Submission of the site visit reports on the monthly basis.
- Certification of the contractor's bills received.
- Issuing the completion certificate, occupancy certificate & stability certificate

Technical Site Inspection

- Conducting periodic site visit with our technical team.
- Monitoring the progress of the works.
- Quality assessment.
- Interpretation of drawings.
- Detailed checking of R.C.C. work.
- Contractor's bill verification.

**Swati Interiors, Silvassa,
Dadra and Nagar Haveli, India**

Designed as a warehouse for a renowned bespoke furniture manufacturer in Silvassa, it reflects the craftsmanship. The architecture moves beyond the conventional industrial typology, creating a built environment that serves as both a production facility and a representation of the brand's identity.

Typology : Industrial

Year : 2018 - 2020

Status : Under Construction

Site Area : 1,56,076.00 sq.ft

Gross Floor Area : 82,927.00 sq.ft

Scope : Architecture, Structural Design

**Tucson Hydrocontrols, Umbergaon,
Gujarat, India**

We collaborated with Perkins Eastman Architects as the local architecture partner for the execution and detailed development of the Tucson Hydrocontrols industrial facility.

Building upon this vision, our role has been to translate the concept into a fully coordinated, buildable solution that responds to the realities of the site, local regulations, construction practices, and execution challenges.

As the local architect, we bridge the gap between design intent and on-site implementation. Our responsibilities include developing detailed architectural drawings, resolving site-specific constraints, coordinating with structural and MEP consultants and supporting the construction team through continuous technical inputs and design refinements.

Typology : Industrial
Year : 2018
Status : Under Construction
Site Area : 88554.48 sq.ft
Gross Floor Area : 92176.10 sq.ft
Scope : Architecture, Structural Design

Blue Star, Silvassa
Dadra and Nagar Haveli, India

The Blue Star Manufacturing Campus is envisioned as a contemporary industrial development that seamlessly integrates manufacturing, research, administration, and support infrastructure within a unified architectural framework. Thoughtful planning prioritises seamless circulation, operational efficiency, and future expansion, resulting in a workplace that is both adaptable and enduring.

As the Architects and Project Management Consultants, we have led the project from design development through execution, ensuring that every component of the campus reflects the highest standards of functionality, efficiency, and design excellence.

Typology : Industrial

Year : 2024 - 2027

Status : Under Construction

Site Area : 3,59,194.00 sq.ft

Gross Floor Area : 2,09,380.00 sq.ft

Scope : Architecture, Structural Design,
Interior Design,
Project Management

**Kryfs Power Components, Silvassa,
Dadra and Nagar Haveli, India**

Developed for Kryfs Powercomponents, a leading transformer manufacturer, this facility represents the fifth project delivered by us over a professional relationship spanning more than three decades.

Typology : Industrial
Year : 2024 - 2026
Status : Uncomplete
Site Area : 3,02,658.00 sq.ft
Gross Floor Area : 3,02,658.00 sq.ft
Scope : Architecture, Structural Design

**Karagwal Developers, Tumbh,
Gujarat, India**

Designed as a large-scale manufacturing and warehousing facility, the project embraces simplicity, efficiency, and the honest expression of industrial architecture. The warehouse is punctuated by continuous skylight slits that introduce soft, diffused daylight deep into the workspace.

Typology : Industrial

Year : 2021 - 2023

Status : Uncomplete

Site Area : 4,07,003.00 sq.ft

Gross Floor Area : 3,30,933.00 sq.ft

Scope : Architecture, Structural Design

**Indcon Project, Dahej,
Gujarat, India**

Conceived as a contemporary industrial facility, the INCON project at Dahej demonstrates how efficiency and architectural clarity can coexist within a pre-engineered building system.

The design embraces the inherent strengths of a PEB structure, creating expansive column-free spaces that accommodate flexible manufacturing, seamless material movement, and future operational growth.

Clean geometries, a disciplined structural rhythm, and a restrained material palette establish an identity that is both robust and refined. Every aspect of the project was developed with a focus on constructability, coordination, and long-term performance.

Typology : Industrial
Year : 2015 - 2016
Status : Uncomplete
Site Area : 10,71,192.00 sq.ft
Gross Floor Area : 2,53,452.00 sq.ft
Scope : Architecture, Structural Design

**Linc Pen & Plastic Ltd, Umbergaon
Gujarat, India**

The proposal communicates a strong corporate identity rather than a conventional industrial facility. The composition is symmetrical, defined by deep horizontal bands, a highly transparent façade, landscaped forecourt, and a restrained material palette.

Its balanced proportions and detailing establish a strong visual presence while reflecting the company's progressive outlook. A carefully landscaped arrival plaza softens the scale of the development, creating a seamless transition between the corporate environment and the surrounding industrial campus.

Typology : Industrial
Year : 2012
Status : Proposed (Unbuilt)
Site Area : 1,12,839.00 sq.ft
Gross Floor Area : 51,905.00 sq.ft
Scope : Architecture

**ATG Tires, Dahej,
Gujarat, India**

For this project, operational efficiency and architectural clarity are brought together. Developed around a pre-engineered building system, the project accommodates large-span manufacturing while integrating administrative and support functions into a cohesive built form.

Typology : Industrial
Year : 2014 - 2017
Status : Uncomplete
Site Area : 41,00,044.00 sq.ft
Gross Floor Area : 13,89,585.00 sq.ft
Scope : Architecture, Structural Design

**MWV, Morai,
Gujarat, India**

Designed as part of a larger industrial campus, the building establishes a distinct corporate presence while maintaining a strong connection to its manufacturing environment. The planning is centred around flexibility and efficiency.

Typology : Industrial

Year : 2006 - 2008

Status : Uncomplete

Site Area : 8,64,845.00 sq.ft

Gross Floor Area : 95,142.00 sq.ft

Scope : Architecture, Structural Design

**Param Packaging Pvt. Ltd, Degam,
Gujarat, India**

The architecture departs from conventional industrial expressions, adopting fluid geometries and a carefully curated material palette to create a building that is both recognisable and purposeful.

The sweeping roof profile and sculpted entrance define a welcoming arrival sequence, guiding visitors into a transparent, light-filled workplace. Expansive glazed surfaces are balanced by warm stone cladding, creating a dialogue between openness and solidity while lending the building a timeless architectural character.

Typology : Industrial

Year : 2018 - 2020

Status : Proposed (Unbuilt)

Site Area : 1,73,452.00 sq.ft

Gross Floor Area : 75,525.00 sq.ft

Scope : Architecture, Structural Design
PMC

**Aadarsh Enterprise School, Kalvada,
Gujarat, India**

The building balances functionality with a warm and welcoming architectural character, providing spaces that are adaptable to the evolving needs of students and educators.

The planning prioritises clear circulation, naturally lit classrooms, and a seamless relationship between indoor learning spaces and outdoor activity areas.

The façade employs a disciplined rhythm of openings and vertical screening elements, creating visual order while moderating daylight and contributing to a comfortable internal environment. A restrained palette of materials lends the building a timeless quality, allowing simplicity and proportion to define its architectural expression.

Typology : Institutional

Year : 2019 - 2020

Status : Uncomplete

Site Area : 1,49,311.00 sq.ft

Gross Floor Area : 74,327.00 sq.ft

Scope : Architecture, Structural Design

**Lion's College, Silvassa,
Dadra and Nagar Haveli, India**

Conceived as a comprehensive master plan, the project brings together academic blocks, administrative facilities, student amenities, and generous open spaces within a unified campus framework that encourages learning, interaction, and community life.

Typology : Institutional
Year : 2020
Status : Proposed (Unbuilt)
Site Area : 6,99,400.00 sq.ft
Gross Floor Area : 6,54,469.00 sq.ft
Scope : Architecture

**SSR College, Silvassa,
Dadra and Nagar Haveli, India**

A simple architectural language, characterised by clean horizontal lines, generous circulation spaces, and repetitive modular planning, ensures economical construction while allowing flexibility for future adaptations.

Typology : Institutional

Year : 2020 - 2022

Status : Uncomplete

Site Area : 5,44,041.00 sq.ft

Gross Floor Area : 1,27,695.00 sq.ft

Scope : Architecture, Structural Design

PMC

**Vedant School, Valsad,
Gujarat, India**

Designed as a contemporary educational institution, Vedant School seeks to create an environment that balances functionality with a strong architectural identity.

The building is conceived as a composition of carefully proportioned volumes, where clean white surfaces, exposed brick, textured stone panels, and pitched roof forms come together to establish a warm yet distinguished institutional character.

The planning is centred around creating intuitive circulation, naturally lit classrooms, and shared learning spaces that support both academic and extracurricular activities.

Typology : Institutional

Year : 2015 - 2016

Status : Uncomplete

Site Area : 1,73,452.00 sq.ft

**Shri Digambar Jain Jinsharanam Tirth
trust, Uplat, Maharashtra, India**

Seeks to create an environment that embodies the principles of serenity, simplicity, and permanence. The architecture balances traditional Jain temple values with contemporary construction practices, resulting in a sacred space that is rooted in cultural heritage while responding to present-day requirements.

Beyond serving as a place of worship, the temple has been envisioned as a space for community gathering, reflection, and cultural continuity, reinforcing its role as a lasting landmark for generations to come.

Typology : Religious
Year : 2015 - 2016
Status : Uncomplete
Site Area : 2,79,890.00 sq.ft
Gross Floor Area : 90,308.00 sq.ft
Scope : Architecture

**Nav Grah Temple, Uplat,
Maharashtra, India**

Conceived as an extension to the Shri Digambar Jain Jinsharanam Tirth Trust, the Nav Grah Temple builds upon the spiritual and architectural language of the existing temple precinct. Rather than establishing a separate identity, the design seeks to reinforce the continuity of the campus, creating a seamless relationship between the original shrine and the new place of worship.

By extending the architectural language of the existing complex with restraint and respect, the project reinforces the temple precinct as a unified place of worship, where every addition contributes to a shared sense of continuity and spiritual purpose.

Typology : Religious

**Smt. Padminiben Chauhan , Silvassa,
Dadra and Nagar Haveli, India**

This private bungalow reinterprets the language of Neo-Classical architecture through a contemporary lens. Symmetry, proportion, and a carefully composed hierarchy of forms define the overall composition, creating a residence that conveys elegance while responding to the aspirations of modern living.

The façade is articulated through a series of grand colonnades, arched openings, layered cornices, and finely detailed mouldings that establish depth and rhythm without overwhelming the composition. Our scope included the detailed design and documentation of every detail.

Typology : Residential

**Shri Deepak Chauhan, Umbergaon
Gujarat, India**

The design of this private residence explores a contemporary interpretation of Neo-Classical architecture, drawing upon the timeless principles of symmetry, proportion, and order while embracing the simplicity of modern residential design.

Rather than replicating traditional architectural forms, the project distills classical elements into a restrained vocabulary that reflects contemporary lifestyles and construction techniques. The residence demonstrates how classical architectural principles can be reinterpreted through clean forms, refined detailing, and contemporary planning, creating a home that is timeless in character and relevant to modern living.

Typology : Residential

Year : 2024 - 2026

**Shri Ramani Farmhouse,
Gujarat, India**

The farmhouse draws its identity from the character of its surroundings and the honest use of locally available materials. Rather than imposing a formal architectural statement, the design embraces simplicity, allowing natural textures, traditional craftsmanship, and the landscape to shape the experience of the home.

Locally sourced stone, brick, timber, and other regional materials form the primary palette, reducing the building’s environmental footprint while creating a strong sense of place. Deep verandahs, shaded outdoor spaces, and generous openings encourage natural ventilation and establish a seamless relationship between the interiors and the surrounding landscape.

**Shri Harshad Ravashia, Umbergaon
Gujarat, India**

The residence is conceived as an exploration of contemporary architecture informed by the enduring qualities of classical design. Rather than drawing from historical precedents through ornamentation, the architecture interprets classical principles through balanced proportions, vertical emphasis, and a disciplined architectural language.

Façade of recessed planes, framed openings, and generous glazed surfaces establishes a sense of rhythm and visual order. The tall arched windows introduce softness to the otherwise rectilinear composition, while subtle horizontal banding and restrained detailing reinforce the building's timeless character.
